

## **CHARTLET FOR THE ORE ENTRANCE 2025**

### ***PLEASE READ AND TAKE NOTE -***

Imray's first 2025 chartlet for the Ore entrance follows on the next page of this PDF.

It was produced for us in April 2025, based on the Trinity House survey carried out in February. We will be keen to hear of any experiences at the entrance that will add knowledge helpful to other readers, using the email address below. At present it does not appear to have changed much since 2024.

*Please note that, as usual, the lines shown between buoys are simply bearing lines to assist buoy spotting, they are **not** recommended courses between buoys.*

The soundings on the chartlet suggest that you should leave the Oxley PHB well clear to port, and when you reach the Weir SHB continue well past it before turning into the river.

We hope to be able to include an aerial photo of the entrance with this note in the near future.

### Caution

This chart is not to be used for navigation. It is based on a survey made by Trinity House on 1st March 2025.

Users are reminded that depths are subject to constant change and consequently this chart should be used with extreme caution as the situation is likely to be different from the one depicted on the date of the survey.

Neither Trinity House nor the publisher will accept any liability for loss, injury or damage incurred by misuse of the data in this chart. Navigators are advised to seek confirmation of the latest situation before attempting to enter the river from the ECP Honorary Port Pilot and Orford Harbourmaster Matt Smy ☎ 07528 092635, or call *Chantry* on VHF Ch 08 (although note that he is based at Orford and may be out of radio range from the river entrance).

Soundings in metres at Lowest Astronomical Tide (LAT). Positions are referred to WGS84 datum.
