The channel up to the Club dries to approximately 1.4m above Chart Datum Harwich and 1.6m towards the Basin Lock Gate. The sill covers at 1.8m above CD and the Gate can be lowered on rising tides of 3.3m above CD or more. A green flag on the starboard entrance wall normally flies to indicate the basin gate is open (lowered). A metal triangle warning sign on the top of the gate indicates a closed (raised) gate. The Harwich Haven Authority website (hha.co.uk) shows live tidal heights which are often above or below predicted levels. The Club slipways and dinghy pontoons are accessible by dinghy with tidal heights above 2.0m.

See larger scale sketch for detail of Club and Basin approach .
